LANGUAGES & FRAMEWORKS

- **Languages:** Java, C, C++, C#, JavaScript, TypeScript, Dart
- **Frontend:** React.js, Next.js, Redux, HTML, CSS, Bootstrap, Tailwind CSS, Flutter
- **Backend:** Spring Boot, Node.js, Express.js, .NET, ASP.NET, Django, Firebase
- **Databases:** MySQL, MongoDB, PostgreSQL, Oracle DB
- **Cloud & Tools:** AWS, Git, GitHub, Bitbucket, ActiveMQ

WORK EXPERIENCE

HulkHire Tech, Hyderabad – *Java Developer Trainee* 08/2025 – present

- **Responsibilities:** Implemented Stripe integration using Java Spring Boot & Microservices, building modular payment-processing and stripe-provider services. Analyzed Stripe integration documentation and collaborated with the team to finalize the end-to-end integration approach. Developed the stripe-provider service integrating with Rest APIs (Create, Retrieve, Expire Session). Implemented security mechanisms using Stripe Basic Auth for APIs and HmacSHA256 for notification processing. Implemented payment status tracking, to ensure 100% reliability of payments.

Infobytes Technosys, Pune – *Full-Stack Developer Intern* 11/2024 – 04/2025

- **PayTrakz:** Developed an advanced expense tracker web application using React.js designed for efficiently managing and monitoring expenses with real-time data insights and secure transaction handling. Improved UI performance and responsiveness for a smoother user experience.
- **Workflow Automation System:** Built a training project in Flutter in a team of two with backend implemented in Firebase.
- **Dairy Delivery App:** Collaborated on the development of a Flutter mobile app for delivery of dairy products, contributing to both UI and back-end API integration.

PROJECTS

Stripe Payment Integration: 08/2025

- **Tech:** Spring Boot, REST API, Spring AI, Microservices Architecture, MySQL, ActiveMQ, AWS, Bitbucket
- Contributed to building a secure and scalable Stripe Payment Integration System using Java Spring Boot in a microservices architecture on AWS.
- Participated in implementing payment processing, payment status management, Stripe PSP REST API integration, notification handling, security enhancements, and error management.
- Explored Spring AI with OpenAI LLM and integrated ActiveMQ for asynchronous messaging.
- Followed RESTful standards, applied design patterns, and strengthened debugging and problem-solving skills.

Vehicle Service Management System – *PG-DAC Project* 02/2024

- **Tech:** React.js, Spring Boot, REST API, .NET MVC, MySQL, Microservices Architecture, GitHub
- Developed a one-stop platform where service centers of multiple automobile brands can register and list their services.
- The system streamlines service booking for customers by eliminating the need for brand-specific apps.
- It acts as a bridge between customers and service providers via a user-friendly web interface, supporting real-time booking and transparent service listings.

EDUCATION

Know-IT CDAC || Deccan, Pune 09/2023 – 02/2024
PG-Diploma in Advanced Computing

Relevant Coursework: C++, OOP with Java, Operating System and Software Development Methodologies, Algorithms & Data Structures (using Java), Database Technologies, Web Programming Technologies, Web-based Java Programming, Microsoft .Net Technologies

Sinhgad College of Engineering || Vadgaon, Pune 09/2019 – 04/2023
B.E Mechanical – 7.49 CGPA

Mudhoji High School || Phaltan, Satara
XII – 68.3% 07/2016 – 02/2017
X – 87.4% 06/2014 – 02/2015
